

Pick & Place

The Pick & Place Series features the Sure-Placer and CD Placer bays to place product directly into the inserter track at a high rate of speed.

Replace-A-Station

Quick and easy to install, gain greater feeder capacity with our Replace-A-Station feeders.

Force Flex

Force Flex Technology stabilizes the paper for a smooth transition through the feeder and enables up to 60,000 inserts an hour.

InkJet Feeder Series

The InkJet Feeder Series provides consistent feeding, higher throughput and a faster return on investment (ROI).

Multi-Purpose Feeder Series

The Multi-Purpose Feeder Series is two feeders in one. With one simple switch of a button, you have the choice of either a fully functional InkJet Feeder or a Replacement Pocket Feeder.

Feeders

Regardless of the application you need to run, our wide range of feeders can help make sure your customers' projects are completed easily and on time.

Feeders

Add-A-Station

Easy to install and space saving, Add-A-Station feeders are compatible with today's leading inserters.

Fastrax Collator

Operating at speeds up to 16,000 per hour and featuring shuttle, rotary and friction combinations, the Fastrax provides you flexibility in the products inserted and the orientation to which they are inserted.

FeedMAX Series

Wrapping, inserting, traying and fulfillment applications can be automated through the use of an on-demand feeder at speeds of up to 60,000 inserts per hour.

Packaging Feeder Series

Wrapping, inserting, traying and fulfillment applications can be automated by the use of an on-demand feeder at speeds of more than 60,000 inserts per hour.
